PROFESSIONAL SUMMARY

Results-driven **Senior IT Consultant** and **Digital Solutions Architect** with 16+ years of experience delivering comprehensive technology solutions. Expert at architecting scalable systems — from custom SaaS platforms and AI-powered automation pipelines to secure enterprise IT environments. Committed to technical excellence, professional integrity, and delivering measurable business value.

EXECUTIVE PROFESSIONAL FOCUS

AI/ML Engineering & Agentic Systems Research

 **Personal R&D / LAWEITECH**

 2025 - Present

- ◆ **Designed and built the Klytron AI Trading Bot — a Python-based algorithmic system fusing machine learning (TensorFlow, XGBoost, scikit-learn) with multi-layer rule-based risk management for capital-preserving automated trading.**
- ◆ Simultaneously architecting Nexus Retail OS as a full Turborepo monorepo (NestJS API, Next.js dashboard, React Native offline-first POS), applying schema-per-tenant PostgreSQL multi-tenancy and real-time offline-sync conflict resolution.

E-Commerce & Retail Tech Platform Architect

 **ShynDorca Enterprise / shyndorca.com**

 2020 - Present

- ◆ **Designed and launched shyndorca.com — a full-stack e-commerce platform for ShynDorca Enterprise, a retail business in Konongo, Ghana.**
- ◆ Built with modern web technologies including inventory management, online ordering, and digital brand presence.

Senior IT Consultant & Digital Solutions Architect

 LAWEITECH

 2017 - Present

- ◆ **Leading end-to-end architecture, development, and deployment of scalable web applications and AI-integrated systems for clients across multiple industries.**
- ◆ Specializing in Laravel ecosystems, cloud-native infrastructure, agentic software engineering, and zero-downtime DevOps pipelines.

SaaS Founder & Platform Engineer

 ScrybaSMS / scrybasms.com

 2014 - Present

- ◆ **Founded and engineered ScrybaSMS — a global SMS gateway platform that has processed 452,800+ messages for 22,780+ users across multiple countries.**
- ◆ Over a decade of sustained engineering stewardship proving the durability of well-architected, mission-critical platforms.

Senior Web Engineer / Consultant

 Freelance

 2012 - 2017

- ◆ **Designed and built custom web solutions using PHP, JavaScript, and modern frameworks for small to medium businesses.**
- ◆ Developed expertise in server administration, database optimization, and secure deployment workflows.

Self-Taught Web Developer

 Independent Projects

 2010 - 2012

- ◆ **Built foundational skills through personal projects, open-source contributions, and intensive self-study via freeCodeCamp, The Odin Project, and W3Schools.**
- ◆ Developed early proficiency in HTML, CSS, JavaScript, and PHP.

Klytron.com — Laravel Portfolio with Zero-Database CMS

2026 - Present

Laravel

CMS

DevOps

SEO

- ◆ The site you are reading right now.
- ◆ A modern Laravel portfolio powered by a custom Markdown CMS — zero database, zero compromise on performance or maintainability.

Klytron AI Init Files

2026 - Present

Developer Tools

AI & Automation

Architecture

- ◆ A structured collection of system prompts, soul files, and AI agent configuration templates.

AI Blog Automation Pipeline

2026 - Present

AI & Automation

Content

DevOps

- ◆ An end-to-end AI blog automation system: from topic ideation to deployment and social media scheduling.

My 4 Laravel Packages

2026 - Present

Developer Tools

PHP

Laravel

- ◆ A comprehensive portfolio of 4 published open-source Laravel and PHP packages.

Klytron Downloader

2026 - Present

Developer Tools

CLI Tooling

Bash

- ◆ A resilient Bash CLI large-file downloader built for unreliable network connections.

Klytron Dev Tools Ecosystem

2025 - Present

DevOps

Security

Infrastructure

- ◆ A full monorepo of 10 interconnected tools managing multi-machine provisioning and disaster recovery.

SPECIALIZED TECHNICAL SKILLS MATRIX (I): ARCHITECTURE & CORE

Digital Solutions Architecture

Full-Stack Development

Systems Integration

Scalable Infrastructure Design

 RESTful & GraphQL APIs

 Cloud-Native Architecture

Microservices & Event-Driven Design

Serverless Computing

Multi-Tenant SaaS Development

 Enterprise Application Integration (EAI)

 API-First Strategy

Offline-First Architecture

 Domain-Driven Design (DDD)

Core Engineering & Programming Languages

PHP (Laravel, Symfony, Yii)

JavaScript/TypeScript (Vue.js, React, NestJS, Express)

Python (Django, Flask, FastAPI, TensorFlow)

Java/Kotlin (Spring Boot, Android)

C/C++ (Systems Programming, Embedded)

Dart (Flutter)

Bash/Shell Scripting

SQL

HTML5/CSS3

Advanced Design Patterns

TDD/BDD

Clean Code Architecture

Performance Tuning

Legacy System Modernization

AI, Machine Learning & Agentic Engineering

🔗 AI Integration & Workflow Design

Large Language Model (LLM) Orchestration

🔗 Agentic Software Engineering

🔗 Multi-Agent System (MAS) Design

Model Context Protocol (MCP)

🔗 Prompt Engineering & Chain-of-Thought

🔗 AI-Assisted Code Generation

Retrieval-Augmented Generation (RAG)

🔗 Custom AI Agent Development

Automated Pipeline Engineering

ML Signal Generation & Classification (scikit-learn, TensorFlow, XGBoost)

Natural Language Processing (NLP)

Computer Vision Fundamentals

Data Engineering & Performance

MySQL

PostgreSQL

MariaDB

MongoDB

Redis Caching

ElasticSearch

SQLite

🔗 High-Availability Database Design

Data Modeling & Normalization

Advanced Query Optimization

NoSQL Strategy

Database Migration & Replication

ETL Pipelines

Data Mining

Big Data Fundamentals

Information Retrieval

Security, DevOps & Cloud Operations

Linux Server Administration (Ubuntu, Debian, CentOS)

Cybersecurity Hardening & VAPT

Zero-Downtime Deployment

GitOps & CI/CD Pipelines (GitHub Actions, GitLab CI)

Docker & Docker Compose

Kubernetes Orchestration

Cloud Platform Management (AWS, Azure, GCP, DigitalOcean)

Infrastructure as Code (Terraform, Ansible)

Network Architecture (VLANs, VPN, Firewall)

Systems & Application Security

Disaster Recovery & Backup Strategy

Computer Science Foundations

Data Structures & Algorithms

Analysis of Algorithms (Big-O)

Discrete Mathematics

Operating Systems Design

Computer Architecture & Digital Electronics

Software Engineering Principles

Comparative Programming Languages

Computer Networks & Protocols

Calculus & Statistics for Computing

 Methodology & Leadership

Agile Excellence (Scrum/Kanban)

Strategic IT Consulting & Virtual CTO

Technical Mentorship & Knowledge Transfer

 Results-First Engineering

Cross-Functional Team Leadership

Product Strategy & Technical Roadmapping

Technical Documentation & Architecture Decision Records

Open-Source Development & Community Building

EDUCATION & PROFESSIONAL CREDENTIALS

AI & Machine Learning Professional Development

Ongoing

 Self-Directed & Online Platforms

Digital Solutions Architecture & Engineering

Self-Paced

 freeCodeCamp, The Odin Project, W3Schools & more

BSc Computer Science

2025 - 2028

 University of the People

Secondary Education (Science)

2005 - 2008

 Accra Academy, Ghana

AUTHENTICATION & VERIFICATION

This document is a certified digital export of the professional history of Michael K. Laweh. For the most up-to-date version, live portfolio proofs, and direct contact, please visit klytron.com.
